### Emissivity Control (CompactPRO Only)

Emissivity is a material property that defines how much IR light is emitted from a particular surface. Calibrate for emissivity through four pre-defined settings to ensure accurate temperature readings and reporting.

### Thermal Span and Level (CompactPRO Only)

Easily set and lock a temperature range to display the maximum thermal information of any object or scene with a set point and range.

### Taking Photos & Video

Swipe left and right to switch between photo & video mode.
